# Demo Bank Backup Policy

## 1. Scope

This fictional policy applies to every server, database and business application of Demo Bank, in the data centre and in the cloud.

## 2. Backup frequency

Critical systems are backed up every day with an incremental backup and every week with a full backup. Other systems are backed up every week with a full backup.

## 3. The 3-2-1 rule

Demo Bank keeps at least three copies of the data, on two different types of storage, with one copy offline and outside the main site. The offline copy cannot be modified or deleted from the production network, which protects it against ransomware.

## 4. Retention

Daily backups are kept for 35 days. Monthly backups are kept for 12 months. Yearly backups of accounting data are kept for 10 years.

## 5. Encryption

All backups are encrypted with AES-256. Encryption keys are stored in the key management service, separately from the backups.

## 6. Recovery objectives

For critical systems the recovery point objective (RPO) is 24 hours and the recovery time objective (RTO) is 4 hours. For other systems the RPO is 7 days and the RTO is 48 hours.

## 7. Restore tests

A restore test of each critical system is performed every quarter. The result is recorded and failures are reported to the CISO within 2 working days.
